CURRENT HOLDINGS of MAINLAND CHINESE JOURNALS

October 1965

U. S. National Library of Medicine

INTRODUCTION

In response to the growing interest in Chinese biomedical research, the National Library of Medicine has compiled this bibliography of its holdings of current Mainland Chinese serials up to October 1965.

The bibliography consists of three parts. The first part contains 92 entries, arranged alphabetically by the Wade-Giles system of transliteration, followed by the Chinese characters, P'in-yin romanization, English translation of title, publisher's name, beginning date of publication, and the Library's holdings.

The second part lists the publishers, arranged alphabetically by the Wade-Giles system, followed by the Chinese characters, and an English translation of each name.

The third section presents a variant title index in dictionary arrangement, containing the Wade-Giles transliteration, P'in-yin romanization, and the English translations of the titles.

The bibliography was compiled by Mr. Stephen Kim, Oriental Area Specialist, Technical Services Division, National Library of Medicine.
